

FACT for Product Managers

Need to ship **secure** software on schedule and on budget?

Are customers and regulators demanding **SBOMs** and attestation?

The aDolus FACT™ platform automates SBOM generation and provides *actionable* vulnerability information so you can ship secure software that meets customer and regulatory requirements – on time, on budget, and with existing resources.

Continuously monitor your entire software inventory

Search 3rd-party components for vulnerabilities and other risks

Generate SBOMs automatically in NTIA-compliant formats

Integrate with existing tools and workflows

Satisfy customer and regulatory attestation requirements

Share vulnerability information with customers via VEX documents

FACT for Product Managers

Improve software supply chain security and visibility with existing staff and resources

FACT Platform Features	Benefits
SBOMs	
<ul style="list-style-type: none">• 1-click NTIA-compliant SBOMs in SPDX and CycloneDX formats• Enriched SBOMs offering drill-down-and-around to expose vulnerable components across your portfolio• VEX (Vulnerability Exploitability eXchange) documents	<ul style="list-style-type: none">• Build brand loyalty through transparency• Create and maintain a competitive advantage• Increase product quality• Provide audit evidence for regulations• Help customers focus on addressing exploitable vulnerabilities
Continuous Supply Chain Visibility	
<ul style="list-style-type: none">• Software validation and easy-to-use scoring for prioritization• Detection of malware hidden in embedded components via multiple AV sources and >21 thousand YARA rules• Certificate chain and signature validation• In-the-wild monitoring for unauthorized or fraudulent files• Release and update artifact tracking	<ul style="list-style-type: none">• Gain detailed visibility into all the vendors, products, and components in your portfolio• Gain operational insights into open source usage• Reduce time spent on malware false-positive reports• Manage software obsolescence• Reduce operational costs through automation
Vulnerability Management	
<ul style="list-style-type: none">• AI-driven scanning of public and vendor vulnerability databases• Natural language processing to overcome inconsistent naming• False positive filtering to reduce noise• Mitigation tracking for non-exploitable vulnerabilities	<ul style="list-style-type: none">• Get in front of high-profile vulnerability announcements• Find vulnerabilities in <i>all</i> products in minutes, not days• Reduce costs through automated vulnerability searching• Focus on addressing critical vulnerabilities
Risk and Compliance Management	
<ul style="list-style-type: none">• 3rd-party supplier discovery• Supplier quality assessments• Risk profiles by product line/portfolio• Detection of high-risk software and components• Executive reporting and KPIs	<ul style="list-style-type: none">• Protect your brand and reduce potential liability• Make informed procurement decisions• Avoid high-risk or blacklisted suppliers or countries• Drive governance and audit of SDLC policies• Be prepared for M&A due diligence
Scalability, Security, Performance	
<ul style="list-style-type: none">• Full-featured RESTful API• Cloud (SaaS) platform with portal• Vendor-, platform-, and operating system-agnostic	<ul style="list-style-type: none">• Integrate with corporate systems, workflows, and processes• Be assured thanks to proven AWS security best practices• Address IT, IoT, and OT products with a single solution• Consolidate visibility for PSIRTs and product management
